JAVA Front-end DEVELOPER (m/f) – Image Processing - Luxembourg

Telemis is a fast growing healthcare IT company specialized in PACS/MACS (Picture/Multimedia Archiving & Communication System), Digital Pathology and Healthcare Business Intelligence solutions. We create (among other things) advanced visualisation interfaces

In order to strengthen its R&D team, Telemis is looking for a Java Frontend Developer

Your responsibilities:
- You will be involved in the choice of technology and architecture, as well as the R&D direction to be taken
- You will participate in the design and definition of development requirements
- You will develop and integrate the various software components
- You will advise on and participate in the migration from the current architecture to a more modern one
- You will participate in the code review
- You will coach junior developers in the R&D team

Your profile:
- You have a degree in computer science or engineering
- You have at least 5 years' experience as a Java developer

Technologies: Must have

- Java (AWT & Swing for the front-end part)

Technologies: Nice to have (but not mandatory)

- Web Development Angular, Cloud, Image processing (frameworks VTK & ITK)

Other requirements:
- You have experience of software (product) development.
- You have architecture skills!
- You enjoy working in a team and are flexible
- You know how to respond to urgent requirements
- You're customer-focused!
- You're open-minded
- You are fluent in English and French

The offer:
- We offer an attractive salary package

- Numerous benefits, including a company car, meal vouchers, hospitalization & group insurance, travel insurance (all fully paid-for for you AND your family)
- A great working environment!
- Friendly colleagues
